WE MAKE BUILDING EASY.® When you build a Veridian home, you get much more than a home designed around you and your dreams. You get the peace of mind that comes with nationally-recognized, award-winning, quality craftsmanship and energy efficiency. You get a home that's constructed using innovative building materials as well as the newest technology and building practices. The result is a high-performing, green and energy efficient home that's a healthier home for you and your pocketbook. And when you build with Veridian Homes, you build with a team of specifically trained experts who make homebuilding easy.

Dream. Build. Live.

Actual floor plans and elevations may differ from those shown based on modifications, options and improvements to the plans by the builder.

WELL NOW THEY'VE thought of everything. That's what you'll be saying to yourself when you start settling into the Davis. With its six closets AND a pantry, you have all the room you need to store whatever your heart desires. So whether you're a fashion enthusiast, an at home chef extraordinaire, or maybe you just have a lot of toys that need storing, the Davis lets you tuck away all your goodies. It's time to start fresh, and decluttered, with the Davis.

\$296 IN SAVINGS EVERY MONTH!*

A LOOK INSIDE THE DAVIS'S ENERGY EFFICIENCY. Lower index = higher efficiency. What does that mean to you? A HERS Index is the industry standard by which a home's energy efficiency is measured. It is also the nationally-recognized system for inspecting and calculating a home's energy performance. A Veridian home receives a rating 56 HERS or better, averaging 51 HERS, compared a typical old used home, which rates at 130 HERS – that's greater than a 70% increase in total energy performance. This means that your dream home will not only look like a dream, but it will run like one too.

*Estimated average monthly energy bill savings with the Davis. The costs were calculated using REM/Rate™ 12.97 and the HERS Score for the reference homes listed in the arrow chart and were published by RESNET, as compared to the typical used home. The typical used and new home scores were determined by the U.S. Department of Energy.
