

LUXURY VINYL

There's nothing like the beauty, durability, and easy maintenance of vinyl flooring. Please take the time to read our simple care suggestions to keep your vinyl looking and feeling brand new.

MAINTENANCE & CARE

- Sweep your floor regularly to remove loose dirt.
- After sweeping, use a damp mop with a pH neutral cleaner for routine cleaning.
- Mop up spills promptly to prevent stains.
- Please keep in mind that vinyl can be slippery when wet.

PREVENTATIVE MEASURES

- Place non-staining mats or area rugs at all exterior entrances to prevent dirt and soil from being tracked onto your floor. Be certain to clean those mats often so they keep the outside from coming in.
- Support furniture with non-staining floor protectors.
- If you need to move heavy furniture or appliances, be sure to lift before moving to protect your floor from gouges.
- Direct sunlight may fade or discolor vinyl. Close shades on occasion to help prevent damage, as heat from direct sunlight can cause unwanted movement and expansion.

CLEANING

- Each manufacturer recommends the use of certain cleaners for their products. Please see your warranty information for suggested cleaning routine and approved cleaners.
- Avoid the use of household cleaners and bleach-based detergents. Do not use soap or detergent cleaning products, as they may leave a film or dull the vinyl surface.

Spill and Stain Removal

- For stubborn stains, spot clean with a concentrated cleaner as recommended by your vinyl's manufacturer. Do not use products containing bleach that can damage your floor.
- When cleaning your vinyl flooring, always use a clean white towel to avoid spreading or adding to the stain.
- For tough stains or spills, information is available on the manufacturer's website. Or contact FLOOR360 for additional assistance.

Did you know?

- A floating floor is designed to move as your home heats and cools and isn't a cause for concern.
