

Veridian Homes Winter 2023 Maintenance Tips

Interior Winter Maintenance Checklist

- Monitor the relative humidity in your home with a hygrometer; you should maintain 35 to 40 percent. This can be controlled by using your exhaust fans, and dehumidifier.
- Condensation on glass, mainly during the winter months, leads to deterioration of the window and the opening surrounding it. To minimize condensation, use your kitchen, bath or furnace fans to reduce your home's relative humidity. Open drapes, shades and blinds to allow warm indoor air circulation against windows.
- Install a dehumidifier to remove excess moisture in the basement.
- Inspect and change your furnace filter per manufacturer recommendations.
- Change or clean your range hood filter to avoid grease and food accumulation.
- Check the PVC ring under your sinks. This ring is located directly above the PVC trap. Verify that these round rings are hand tight so that water will not leak.
- Inspect and change batteries, in your thermostat.
- Confirm all windows are closed and locked.
- To minimize the potential for a frozen plumbing line/pipe in severe weather conditions, do not lower the heat to less than 55 degrees. Leave cabinet doors open under sinks to allow warm air to circulate. In the event of a power outage, leave faucets on slightly so water can run slowly. If frozen pipes occur, contact a plumber.

Energy Saving Tip: Save energy this winter by setting back the temperature on your thermostat when you're asleep or not at home. For every degree you lower the temperature over a selected period, the more you can save on your heating bill.
Go to www.mge.com for more energy saving tips.

Exterior Winter Maintenance Checklist

- Check gutters and roof for excessive ice/snow build up. Ice damming can cause roof leaks and may result in drywall/insulation damage. Remove ice/snow with a broom/snow rake.
- Do not use salt or ice removers on concrete; they will cause pitting and/or spalling. We recommend using sand for traction.
- Keep your exterior lights on for safety during the evening.
- Inspect all air intake and exhaust ports. Keep them clear of any obstructions such as overgrown shrubbery and snow.
- Lube the overhead garage door and track.

If you do not feel confident in performing any of these duties, please contact a professional.

Show us that Smile and Win \$100!

As a Veridian homeowner, you can win \$100 in our Photo Contest. Just send us your best seasonal photos of life in or around your home. In addition, the first runner up will receive \$75 and the second runner up will receive \$50. What we really want to see are seasonal photos that represent your lifestyle, and all the fun you have with your family and neighbors. The winning photos will be shown in the next newsletter.

So come on homeowners, pull out those cameras and show us your smile!

Rules:

1. Photos must be taken inside or in the yard of a home built by Veridian Homes, Don Simon Homes or Midland Builders.
2. A current resident of the home must submit the entry.
3. Label back of the photo or email with your name, address and neighborhood.
4. Veridian Homes staff will select the winners.
5. Your entries must be submitted by March 8, 2024.
6. Prizes will be awarded by March 15, 2024 and the winning photos will be shown in the Spring 2024 Newsletter.
7. Photos will not be returned, so please keep a copy.
8. By submitting your photo, you give Veridian Homes the right to use your photo in future marketing materials.
